

Can you run all areas of your clinic from your practice management system?

- ✓ **LIVE ACCESS** – All data is stored on the cloud where it can be edited live and viewed by multiple users
- ✓ **EASE OF USE** – The system matches the functionality of Windows making it easy to navigate while storing all a patient's information in one place
- ✓ **SECURITY** – With patented time synchronisation technology, customer information is never comprised and all your files are secure
- ✓ **PAPERLESS** – Run a 'paper-free' practice by scanning all documents, typing directly into the system and sending electronic invoices

What do our customers say...

“I can **generate prescriptions, appointment letters and patient information leaflets** during the consultation and quickly raise and print an invoice to either give to the patient or transmit electronically.”

Richard Motley - Consultant in Dermatology and Cutaneous Surgery, Cardiff
